"The Economic Potential of Geothermal Resources in California," Prepared by the
Geothermal Resources Board of the State of California

This report to the Legislature, which is in response to Senate Resolution 331 (1970), is now in print. The publication contains 35 pages and one map; it updates all previous geothermal reports to the California Legislature. The cost per copy, including postage, is \$1.00.

Please send check or money order payable to the Division of Oil and Gas:

2116 -- 9th Street, Room 1316
Sacramento, CA 95814

State of Oregon

Now available:

"Thermal Springs and Wells" (of Oregon), by R. G. Bowen and N. V. Peterson, (1970). The price, including postage, is \$1.00.

For copy write:

Department of Geology and
Mineral Industries
Portland, Oregon 97201

The State of Oregon has a geothermal resources bill before the State Legislature.

State of Utah

Now available:

"Major Thermal Springs of Utah," by J. C. Mundorff, Water Resources Bulletin 13, 1970. The price, including postage, is \$3.00.

For copy write:

Utah Geological and Mineral Survey
Utah Geological Survey Building
University of Utah
Salt Lake City, Utah 84112

University of California, San Diego

Dr. James Brune submits the following items:

"Heat flow studies of the crust and mantle in northwestern (Sonora state) Mexico and Baja California will be carried out by Dr. James N. Brune and Dr. John Sclater of the University of California, San Diego, in cooperation with Dr. Cinna Lemnits of the Universidad Nacional Autonoma de Mexico and Engineer Frederico Mooser of the Comision Federal de Electricidad. This is a region where tectonic control from off-shore magnetic anomalies is excellent. The results of this study will establish how the heat flow provinces in the United States extend into Mexico and hence will help relate the tectonic history of Mexico to that of the southwestern United States. The study is being funded by The National Science Foundation."

University of California, Riverside

The University of California, Riverside, will host a Geological Society of America meeting March 25-27, 1971. This meeting will feature a symposium on the Salton trough, March 26, which should supply useful information to those interested in developing geothermal resources in the Imperial Valley area.

- GEOHERMAL HOT LINE EXTRA -

A final date and meeting place has been set for the geothermal course announced in issue No. 7 (October 20, 1971) of the "Hot Line." It has been rescheduled to take place December 13 through 16, 1971.

The first meeting is scheduled for 9:30 a.m., December 13, in Room 133 of the Resources Building, 1416 - 9th Street, Sacramento.

The possibility of incorporating other guest lecturers on specific subjects is being considered. If the increased cost is not prohibitive, this would provide much valuable information and a welcome change of pace for both Jim Combs and the class.

Because of space limitations, a tentative, maximum group of 35 persons has been established. In order to be sure of a spot, make your reservations as soon as possible. Remember the November 19 deadline!

For information and reservations, call or write:
